

Yuansin Wan

Data Analyst / BI Analyst

0920-388458 | circle992021@gmail.com | Taichung, Taiwan | <https://github.com/Circle2026>

PROFESSIONAL OVERVIEW

I am a career changer transitioning from a background in food technology and food safety management to Data Analytics and Business Intelligence.

My previous experience includes HACCP, ISO 22000, food safety management, documentation, and process management.

I am currently building practical skills in SQL Server, Python, SSAS, SSRS, and Power BI, with a focus on data processing, data modeling, reporting, visualization, and business intelligence.

I am interested in combining my previous food industry domain knowledge with data and BI skills to support data-driven analysis, reporting, and decision-making.

WORK EXPERIENCE

FOOD TECHNOLOGIST | Château Hotels & Resorts, TAIWAN OCT 2022 – MAY 2025

- Maintained HACCP and ISO 22000 food safety systems
- Managed food safety documentation and procedures
- Supported compliance and operational processes
- Worked with structured records and operational data
- Collaborated across functions

INTERNATIONAL WORK EXPERIENCE

Working Holiday — Ireland JUN 2025 – MAR 2026

Developed adaptability, problem-solving, and cross-cultural communication skills through working in a diverse international environment.

- Independently identified and resolved day-to-day work issues, strengthening problem-solving and information organization skills.
- Adapted communication and working approaches to different cultural and professional environments to effectively understand requirements and complete tasks.
- Collaborated with colleagues from diverse backgrounds, strengthening communication, requirement clarification, and teamwork skills.
- Adapted to different workflows and management styles while maintaining attention to detail and work standards.

SIDE PROJECT

Project 1 | Consumer Behavior and Promotion Strategy Analysis

Analyzed the relationship between product discounts, customer segments, and profitability using SQL and Power BI. Developed an interactive dashboard to evaluate the impact of different promotional strategies on business performance.

Technologies:

- Cleaned and prepared data using Python
- Built analytical datasets using SQL
- Performed data transformation with Power Query
- Designed a Star Schema data model
- Created DAX measures to analyze discount rates and net profit
- Developed interactive Power BI dashboards

Key Achievement:

- Identified that several highly discounted products did not generate proportional profit growth, providing insights for optimizing promotional strategies.

Portfolio: https://myportfolio2026.streamlit.app/contoso_project

Project 2 | Customer Churn and Customer Service Satisfaction Analysis

Used Python and SQL to analyze customer churn rates across countries, industries, and product usage categories. Built an interactive dashboard to explore the impact of customer satisfaction and product usage patterns on customer retention.

Technologies:

- Performed data cleaning using Python
- Analyzed customer churn metrics using SQL
- Conducted customer segmentation analysis
- Designed data visualizations and dashboards with Looker Studio

Key Achievement:

- Found that customer service performance metrics showed limited correlation with customer churn, suggesting that other business factors may have a greater impact on retention.

EDUCATION

Bachelor of Science in Health Industry Technology Management | Chung Shan Medical University,
Taichung 2018-2021

TECHNICAL SKILLS

Database & BI: SQL Server · SSAS · SSRS · Power BI · Power BI Report Server

Programming & Data: Python · Pandas · SQL · Excel · CSV

Data Engineering: ETL · Data Integration · Data Transformation

Analytics & Reporting: Power Query · DAX · MDX · Data Modeling · Data Visualization · KPI

Development Tools: Visual Studio · VS Code · GitHub · Streamlit

Domain Knowledge: HACCP · ISO 22000 · Food Safety · Document Control · Process Management · Quality Management

Currently Learning: Snowflake · Cloud Data Platforms · SSIS · Web Scraping · Big Query

CERTIFICATION

Google Analytics Certification

TOEIC-Score 765

HACCP A/B

Food Technologist

Exhibition and Convention Professional Certification
